RIDWAN MAKINDE

SOFTWARE DEVELOPER

+2348063804622 | makinderidwan73@gmail.com | IBADAN, NIGERIA

EXPERIENCE

Midcel Software Solution | Frontend Developer   **Remote**
- Spearheaded the development of comprehensive, responsive and dynamic admin, manager and client portals as the sole frontend engineer, utilizing technologies such as typescript, react and sass.
- Implemented various optimization techniques such as lazy loading, code splitting, browser caching, which resulted in reduced initial page load times and improved overall website performance.
- Successfully led the testing phase of the system using react testing library and jest, resulting in an improved performance and overall user experience.

Dec. 2023 – Present

Sulphil Tech Hub | Frontend Developer   **Remote**
- Contributed to the development of a digital clinic with distinct dashboards for doctors, patients and pharmacies, using typescript, nextjs, redux and sass.
- Developed and integrated key features, including push notification and location-based pharmacy search, optimizing patient experience by providing the closest pharmacy information.
- Implemented robust debugging techniques such as error logging and deduction strategy, which resulted in an improved stability and overall performance of the system.

Sep. 2023 – Jan. 2024

Payzita Financial Services | Software Developer Intern   **Remote**
- Transformed numerous design wireframes into responsive and functional user interfaces using ReactJs.
- Collaborated with the backend team to integrate frontend components with server side logic.

Jun. 2023 – August 2023

Enoverlab | Software Developer Intern   **Lagos, Nigeria**
- Developed a robust system that connects event vendors with their potential customers, using nextJs, typescript and firebase.
- Integrated payment gateway with stripe, allowing users to perform online transactions
- Conducted extensive testing and debugging to identify and resolve any software issues, ensuring high quality and reliable performance.

Jun. 2022 – Jan 2023

PROJECTS

- **VendorsHub**
  Co-led a cross functional team to develop a system that connects event vendors with their target customers. Utilizing nextjs, typescript and firebase, an event vendor can register their business and customers can browse through series of vendors, view their details and contact them for potential transaction.

- **Printify**
  Built a system that addressed the issue of log queues at printing shops. Leveraging my skills in typescript, ReactJs, firebase and tailwindcss, I crafted an effeicient system that allows a user to send their document for printing remotely, set preferred pick-up times and monitor the status of their order in real time.
